

Environment and Safety care is considered by Miroglio & C. to be one of the most important priority today, and is based on the following points:

- Respect all the laws about the environment and Safety care and to be continuously adjourned about their applications in automotive field.
- Take care of the environment and safety internal and external of the company. Going through all the evaluations of the impacts, control and measure all the activities to obtain a continuous improvement.
- To manage the reductions of natural resources utilization.
- Regard and reduce the production of pollution emissions.
- Increase the knowledge about the environment care to the workers, and involving their participation in the reduction of pollution.

Activities:

- 1) Since 2006 ISO 14001 certification.
- 2) Since 2004 we have been buying only electrical Energy coming from renewable resources, which are certified and guaranteed by the supplier
- 3) In 2008 and 2010 we installed solar panels on the roofs. Total power is more than 130 KWH.

- 4) Since 2011 Safety certification OHSAS 18001
